OUR HERITAGE & LEGACY

7

origin comes from a USA family bloodline, James Watkins enlisted in the US army at the age of 18 years, prompted by the bombing of Pearl Harbor. James served in New Guinea, and the southern Philippines as a part of the Philippine Liberation campaign. After the War ended, James was discharged on 30th December 1945.

James moved to Australia and founded Tasco Sales (AUST) Pty Ltd (TSA) in 1965. Now recognised as the largest specialty optical distributor in the southern hemisphere, for over 50 years, TSA has proudly presented leading optical brands to the commercial and consumer market, however, the range of accessible, high-quality rifle scopes was always a challenge to provide.

In 2018, TSA founded ZeroTech Optics to fill this gap. Focusing solely on providing high-quality, accessible, and precise rifle scopes that meet the stringent Australian quality assurance requirements, ZeroTech rifle scopes were quickly adopted into the Australian shooting market. The year 2020 saw ZeroTech go international, establishing a base in the US and distributing to our partners in the Americas, Europe, the United Kingdom, Africa and South Pacific nations.

Designed, engineered and quality assured by our team in Australia, ZeroTech scopes deliver repeatable performance using precision turret systems and ZeroTech proprietary reticles that apply to a range of applications and environments.

James Watkins was awarded with the Purple Heart and Bronze Star in 1944.

VENGEANCE

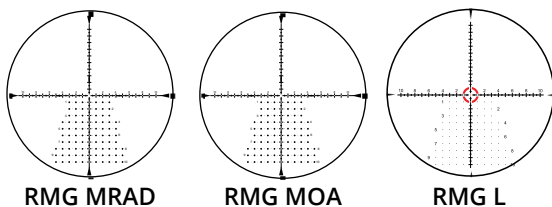

VENGEANCE / VENGEANCE

HD

FEATURES FFP

- ← **First Focal Plane (FFP) Reticle:** The reticle is positioned in the first focal plane, meaning it scales with magnification. This ensures that holdovers and windage marks remain accurate and consistent across the entire zoom range, allowing for precise ballistic corrections at any magnification.
- ← **ZeroStop Turrets:** Ensures return to zero after dialing elevation providing a quick reference in the field.

THRIVE

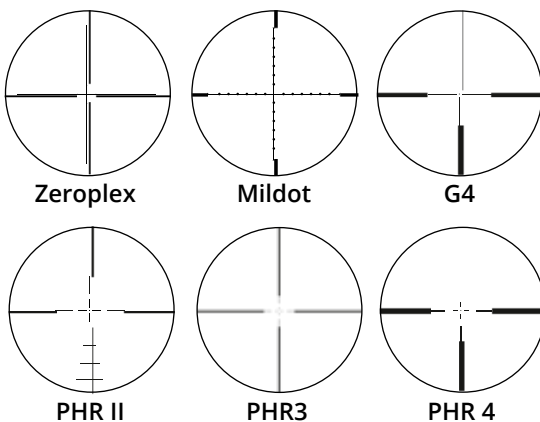

The THRIVE series is designed for hunters and shooters who demand quality and reliability without breaking the bank. Built with a 30mm tube and crafted from high-quality materials, THRIVE riflescopes offer excellent clarity and durability, making them perfect for a wide range of shooting activities. Whether you're hunting in the backcountry or fine-tuning your accuracy at the range, THRIVE riflescopes deliver consistent performance and value.

With their straightforward design and ease of use, these scopes are ideal for beginners and seasoned shooters alike who need dependable optics for general-purpose shooting.

3 MOA DOT

THRIVE RED DOT 3 MOA

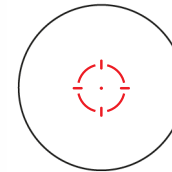

Reticle 3 MOA DOT

CODE: THRD25

The THRIVE RED DOT combines design simplicity and speed into one compact, rugged unit that will prove to be a favourite for speed shooting. With 11 brightness settings and a super crisp 3 MOA dot, the THRIVE RED DOT will not disappoint.

FEATURES

- ← Variable Mounting Options: Includes four, user configurable mounting heights (1.1", 1.4", 1.6" & 1.93"), providing exceptional versatility across different platforms.
- ← Robust Construction: CNC cut 6061 T6 aluminium body
- ← Etched Reticle
- ← Expansive Eye Relief
- ← Enhanced Optical Clarity

PRISM DOT

THRIVE HD MICRO PRISM 1X20

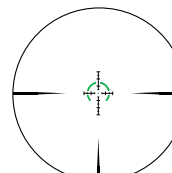

Reticle PRISM DOT

CODE: THDMP120

The 1x 20 MICRO Prism Scope is a versatile and robust optic designed for quick and clear sight acquisition across various shooting applications. Featuring four variable mounting height options, this micro prism is CNC cut from a solid billet of 6061 T6 aluminium. Its expansive eye relief and laser etched, illuminated reticle enhance both versatility and precision, making it an ideal choice for hunting, recreational, and competitive shooting.

FEATURES

- ← 1- 4x magnification
- ← Intergrated, reversible Pic rail QD mount
- ← 3" (77mm) eye relief
- ← 0.5 MOA elevation and windage adjustment
- ← Astigmatism buster!
- ← Illuminated, etched reticle
- ← 100 MOA elevation adjustment.

RAP-R

THRIVE HD VARIABLE PRISM

Reticle RAP-R

CODE: THDP1424

The Thrive HD 1-4x24 Variable Prism Scope is an innovative leap forward in optical engineering, merging the robustness and clarity of traditional prism scopes with the adaptability of variable magnification. Designed with etched reticles for battery-free reliability, this scope provides crisp, detailed visuals in any condition, making it ideal for shooters with astigmatism. Compact, rugged, and versatile, the Thrive HD 1-4x24 is perfect for self-defense, dynamic shooting, or recreational use.

TRACE ED

The TRACE 8x45ED, 10x45ED and 15x56ED binoculars are engineered for those who demand the highest optical performance in the harshest environments. Featuring Dual ED lenses, Abbe-Koenig prisms, and precision-ground Lanthanum glass, they deliver outstanding clarity, contrast, and light transmission with minimal chromatic aberration. Built around a lightweight magnesium alloy chassis, each model offers a generous field of view and rugged durability—making the TRACE series the ultimate choice for serious hunters, wildlife observers, and outdoor professionals.

FEATURES

- ← Abbe-Koenig prisms
- ← Dual ED Lenses – Excellent clarity, field of view (FOV) & light transmission.
- ← Ergonomic rubber armour.
- ← Waterproof.
- ← Fully multi coated (FMC) lenses.
- ← Dielectrically coated Abbe-Koenig Prisms
- ← Unconditional lifetime warranty.
- ← Premium flip-top carry bag/ harness and shoulder strap included with 5x56.
- ← Custom EVA Case with 8x45/10x45.

Binocular Bag & Harness

Lightweight and compact protective flip-top carry bag to fit all popular ZeroTech binocular models up to a 42mm objective lens.

- ← Binocular attachment points
- ← Rugged and durable construction
- ← 1 zip pocket, 2 side pockets, 1 back pocket
- ← Magnetic closing plus fail-safe clasp
- ← Includes 4-point connection body harness & shoulder strap.

CODE: ZTA-CBH

TRACE

TRACE

FEATURES

- ← 20-60x magnification power
- ← Optimised Spotting Reticle (OSR) FFP MRAD reticle
- ← In-line magnification, focus and dioptre adjustment assembly
- ← ED glass with Fully Broadband Multi Coated (FBMC) lenses.
- ← MAGPUL® MLOK® compatible slots located at 12, 3 & 9 o'clock positions
- ← MAGPUL® MOE® 5 slot rail mount (optional) located at 6 o'clock for tripod mounting.

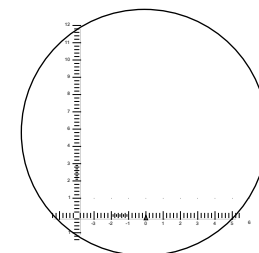

Finally, a first focal plane (FFP) spotting scope with a reticle optimised for long range and ELR shooters. Our TRACE ADVANCED 20-60x80ED features a compact, in-line magnification and focus system, FFP OSR reticle and ED glass. M-LOK® interfaces accommodate fitment of aiming devices, carry points and a multitude of additional accessories.

THRIVE

FEATURES

- ← 20-60x Magnification Power
- ← 85mm Objective Lens
- ← Combined Prism Type
- ← Fully Broadband Multi-Coated (FBMC) Lenses
- ← Tube Focus System
- ← Integrated ARCA Compatible Tripod Adapter
- ← Conventional 1/4x20 Thread - compatible with standard tripods
- ← IPX5 Waterproof Rating
- ← Soft Carry Case/Bag Included.

EXCEPTIONAL CLARITY & VALUE FOR LONG-RANGE OBSERVATION

Experience unparalleled optical performance with the THRIVE Spotting Scope TH206085, designed for both rifle range target checking and long-distance observation. Competing with high-end brands at a fraction of the price, this spotting scope delivers exceptional value and clarity, ensuring you won't be disappointed.

At ZEROTECH, we recognise modern advancements in firearms and ammunition technology have unlocked previously unattainable levels of precision. Our focus is to develop exceptional aiming systems. ZEROTECH reticles have been carefully designed to enable shooters to extract the highest potential from their shooting systems. Carefully tailoring a blend of precision and usability, ZEROTECH reticles are perfect for all shooting applications.

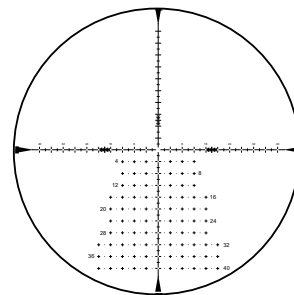

RETICLES

FIRST FOCAL PLANE

RMG FFP

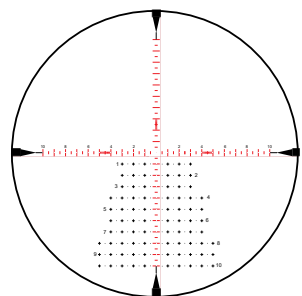

Whether holding elevation and windage for high speed, precision shots or dialling your turrets for long range targets, the RMG (Refined Mil Grid) is the perfect blend of precision and speed. Subtended in 0.5 mil increments with integrated 0.1 mil measuring bars, the RMG allows shooters to apply elevation and windage holds without having to dial the turrets. A floating centre dot ensures a refined point of aim for zeroing and shooting groups, while the heavy bars with chevron ends at 3, 6, 9 and 12 o'clock help draw the shooter's eye to the centre of the reticle at lower magnifications.

RMG MOA FFP

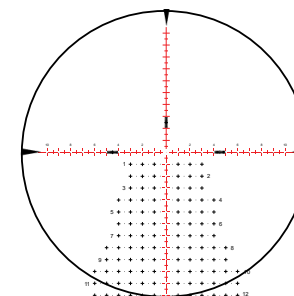

Subtended in 2 MOA increments with integrated $\frac{1}{2}$ MOA measuring bars, the RMG MOA allows shooters to apply elevation and windage holds without having to dial the turrets.

A floating centre dot ensures a refined point of aim for zeroing and shooting groups, while the heavy bars with chevron ends at 3, 6, 9 and 12 o'clock help draw the shooter's eye to the centre of the reticle at lower magnifications.

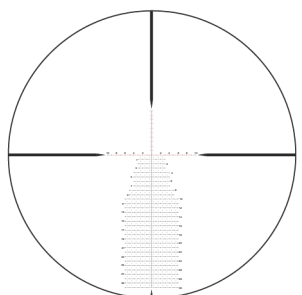

RMG ILLUMINATED FFP

Whether holding elevation and windage for high speed, precision shots or dialling your turrets for long range targets, the RMG (Refined Mil Grid) is the perfect blend of precision and speed. Subtended in 0.5 mil increments with integrated 0.1 mil measuring bars, the RMG allows shooters to apply elevation and windage holds without having to dial the turrets. A floating centre dot ensures a refined point of aim for zeroing and shooting groups, while the heavy bars with chevron ends at 3, 6, 9 and 12 o'clock help draw the shooter's eye to the centre of the reticle at lower magnifications.

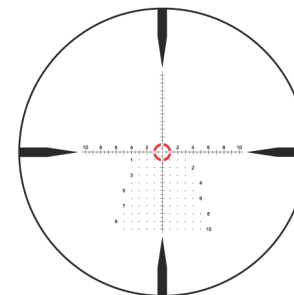

RMG 2 ILLUMINATED FFP

Subtended in 0.5 mil increments with integrated 0.1 mil measuring bars, the RMG 2 allows shooters to apply elevation and windage holds without having to dial the turrets. A floating centre dot ensures a refined point of aim for zeroing and shooting groups, while the heavy bars with chevron ends at 3, 6, 9 and 12 o'clock help draw the shooter's eye to the centre of the reticle at lower magnifications. The illumination feature has been carefully designed to allow maximum usability of the reticle in all environmental conditions, whilst permitting effective shot placement at shorter ranges on lower magnification settings.

RMG 3 FFP Reticle

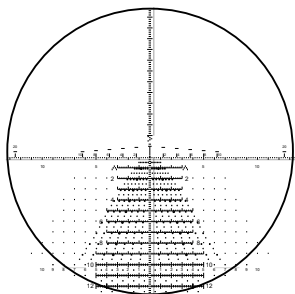

Designed for precision rifle applications to permit the highest degree of precision and accuracy, the RMG 3 is equally at home in competition as it is in the field. Subtended in 0.2 MRAD increments, with resolution down to 0.1 MRAD featuring an ultra fine floating centre cross. The illumination feature has been carefully designed to allow maximum usability of the reticle in lower light conditions and will facilitate effective shot placement at shorter ranges on low magnification settings.

RMG-L FFP

Based on our popular RMG design, the RMG-L reticle is optimised for Low Power Variable Optics while retaining many of the features and benefits for precision shooting applications. A central 2 MRAD segmented circle facilitates rapid and precise shot placement. At lower magnification, it simulates red dot performance under illumination, assisted by heavy bars located at 12, 3, 6 and 9 o'clock positions.

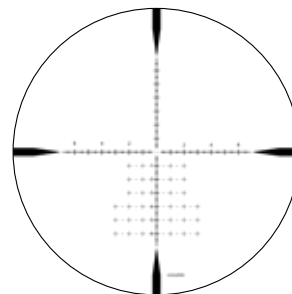

FIRST FOCAL PLANE

TREMOR 3™ FFP

The TREMOR3™ reticle is designed to maximise the speed and accuracy of marksmen. Its unique use of patented features gives users the capability to quickly estimate the range to targets while also giving the user wind speed and drop correction information for fast and accurate Second Shot Corrections.

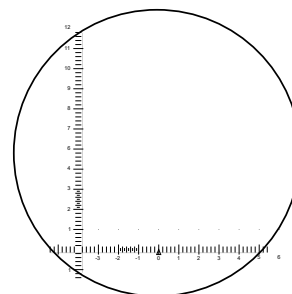

Visit the Horus website for more information:
horusvision.com/reticles/tremor3/

LR HUNTER FFP

Precision – Simplicity – Speed. The LR Hunter has been developed for shooters and hunters who are looking for a 'do it all' reticle. The combination of First Focal Plane (FFP) and adjustable illumination enables the LR Hunter to mimic traditional reticles on low magnification. Whilst at higher powers, a level of precision is on offer to help you connect with the farthest targets.

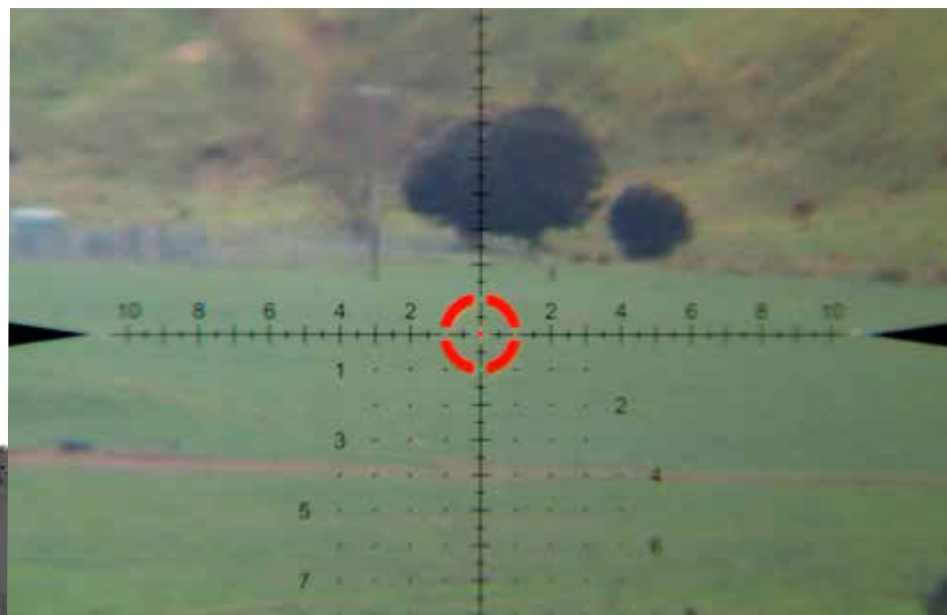

The LR Hunter is a true hybrid.

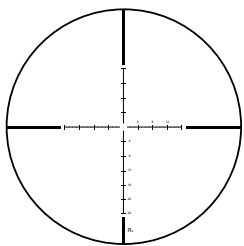

OSR

The Optimised Spotting Reticle (OSR) is a First Focal Plane (FFP), milradian based offset reticle. The OSR enables the largest possible field of view due to its offset design whilst retaining all the benefits of a FFP reticle.

When precision and speed matter, the OSR is the perfect companion.

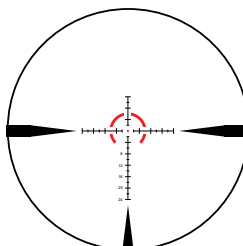

SECOND FOCAL PLANE

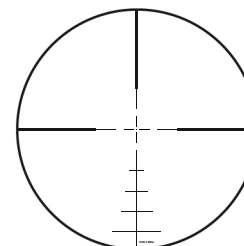

R3 SFP

The R3 reticle allows the shooter to enjoy all aspects of a second focal plane (SFP) scope without losing the ability to 'hold over' with extreme precision for long range shots. The R3 features a floating centre dot and subtenions of 1 MOA marked by dots with a hash mark every 4 MOA. Heavy bars at 3, 6, 9 and 12 o'clock make target acquisition a breeze.

RAR SFP

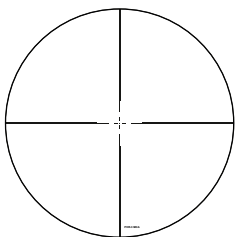

The RAR Illuminated reticle allows for rapid target acquisition and speed shooting, yet enables precision shots when required. The heavy outer bars taper to sharp and precise points, leading the shooter's eye naturally to the centre of the reticle.

PHR II SFP

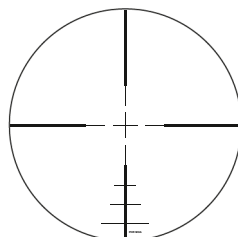

The PHR II shares all the features of the PHR reticle with the addition of a floating centre dot for an ultra-refined point of aim as well as a finer 6 o'clock post, enabling even more precise elevation 'hold overs'.

PHR 3 SFP

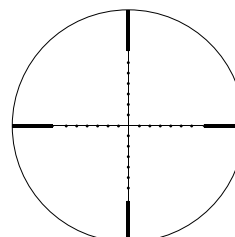

Bringing the old world crosshair reticle into the new school of precision hunting, the PHR 3 is the solution! Designed with precision shooting in mind, the PHR 3 delivers many of the benefits of the PHR II reticle, in a simplified format.

PHR SFP

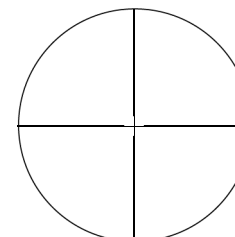

Indexed in MOA, the PHR mimics a more traditional hunting reticle with the addition of some modern advancements. A floating centre cross allows for a refined point of aim while losing none of the 'pointability' of a traditional hunting reticle.

MILDOT SFP

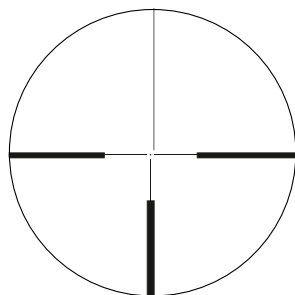

A traditional reticle, calibrated in mils, giving shooters the added ability to take long range shots with a high degree of precision.

ZEROPLEX SFP

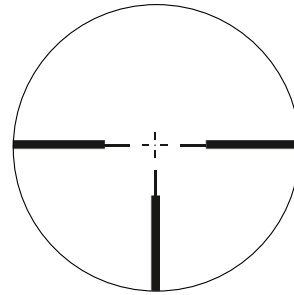

A favourite reticle for shooters of all disciplines where speed and simplicity is key.

G4 SFP

The G4 reticle is boldly engineered for advanced shooting applications. It features expansive reference markers at 44 and 22 MOA for long-range holdovers, paired with ultra-fine calibration elements of 0.7 and 0.2 MOA for minute adjustments. This versatile design provides precise guidance across varied engagement ranges, making it perfect for shooters who require both a broad field of view and meticulous accuracy.

PHR4 SFP

The PHR 4 is an illuminated, next-generation reticle crafted for precision shooting. With a mix of wide and narrow MOA elements—including 5 MOA holdovers, fine 0.5 MOA markers, and a generous 12.5 MOA reference—the PHR 4 ensures rapid target acquisition and precise elevation adjustments. It's ideally suited for hunters and tactical shooters who demand pinpoint accuracy in dynamic, fast-paced situations.

PRISMÁTICOS VENGEANCE

VENGEANCE prismáticos diseñados para ofrecer un rendimiento, una fiabilidad y una relación calidad-precio de primer nivel a los amantes de las actividades al aire libre de todo el mundo. Pensados para quienes buscan una óptica de confianza sin pagar un sobreprecio, la gama VENGEANCE es la puerta de entrada perfecta a un buen cristal para caza, senderismo, acampada y observación de fauna. Resistentes, versátiles y listos para cualquier aventura.

CARACTERÍSTICAS

- ← Claridad excepcional, campo de visión (FOV) y transmisión de luz
- ← Revestimiento de goma ergonómico
- ← Impermeable
- ← Lentes totalmente multicapa (FMC)
- ← Garantía de por vida incondicional
- ← Incluye bolsa acolchada y correa para el cuello

MARINE

Los VENGEANCE Marine 10x42 están pensados para navegantes, pescadores y exploradores del mar que necesitan un rendimiento robusto, impermeable y antivaho. Con óptica de alta definición, un amplio campo de visión y lentes totalmente multicapa, ofrecen una nitidez excelente en cualquier situación. Una correa flotante ZeroTech a medida garantiza que, si se caen, se mantengan a flote, aportando tranquilidad y un rendimiento fiable sobre el agua.

VENGEANCE HD / ED

Vengeance HD

Los VENGEANCE HD ofrecen una nitidez de alta definición con mayor contraste y una reproducción del color más fiel. Diseñados para cazadores y amantes del aire libre, combinan un rendimiento óptico de primera con una resistencia fiable para cualquier clima, ofreciendo una relación calidad-precio sobresaliente para quienes exigen calidad sin concesiones.

- ← Cristal HD – Excelente nitidez, campo de visión (FOV) y transmisión de luz
- ← Armadura de goma ergonómica
- ← Lentes totalmente multicapa (FMC)
- ← Prismas BAK-4 con recubrimiento dieléctrico
- ← Rueda de enfoque suave y rápida
- ← Impermeable
- ← Incluye bolsa acolchada suave y correa para el cuello.

Vengeance ED

El VENGEANCE ED ofrece una nitidez de alta definición con cristal ED de primera calidad, que reduce la aberración cromática para lograr imágenes nítidas y fieles a la realidad. Con una transmisión de luz superior, un amplio campo de visión y un diseño robusto para cualquier clima, es ideal para cazadores exigentes, observadores de aves y amantes del aire libre que buscan el máximo rendimiento en cualquier condición.

- ← Campo de visión ultrapanorámico e imagen estable
- ← Cristal ED premium
- ← Rendimiento líder en baja luz
- ← Impermeable y antivaho
- ← Armadura de goma resistente y diseño antideslizante para uso en el campo
- ← Incluye bolsa acolchada suave y correa para el cuello.

THRIVE / THRIVE HD

THRIVE

Las ópticas THRIVE nacen con un objetivo claro: ofrecer el mejor rendimiento, fiabilidad y relación calidad-precio para amantes del aire libre de todo el mundo.

- ← Claridad excelente, gran campo de visión (FOV) y alta transmisión de luz
- ← Revestimiento de goma ergonómico
- ← Impermeable
- ← Lentes totalmente multicapa (FMC)
- ← Garantía de por vida sin condiciones
- ← Incluye funda de transporte con tapa abatible y correa de hombro

THRIVE HD

Los prismáticos THRIVE HD están diseñados expresamente para quienes se adentran de verdad en la naturaleza. Con cristal Extra-Low Dispersion (ED) de primera calidad, óptica totalmente multicapa y un chasis resistente e impermeable, Thrive HD ofrece una nitidez viva de borde a borde y una fidelidad de color excepcional, incluso con poca luz.

- ← Cristal ED: claridad excelente, gran campo de visión (FOV) y alta transmisión de luz
- ← Revestimiento de goma ergonómico
- ← Rueda de enfoque suave y rápida
- ← Impermeable
- ← Lentes totalmente multicapa (FMC)
- ← Prismas BAK-4 con recubrimiento dieléctrico

TRACE ED

Los TRACE 8x45ED, 10x45ED y 15x56ED están diseñados para quienes exigen el máximo rendimiento óptico en los entornos más exigentes. Con lentes ED dobles, prismas Abbe-Koenig y cristal de lantano rectificado con precisión, ofrecen una claridad, un contraste y una transmisión de luz sobresalientes, con una aberración cromática mínima. Construidos sobre un chasis ligero de aleación de magnesio, cada modelo proporciona un amplio campo de visión y una resistencia a toda prueba, lo que convierte a la serie TRACE en la elección definitiva para cazadores exigentes, observadores de fauna y profesionales del aire libre.

CARACTERÍSTICAS

- ← Prismas Abbe-Koenig
- ← Lentes ED dobles - Claridad excelente, campo de visión (FOV) y transmisión de luz.
- ← Revestimiento de goma ergonómico.
- ← Impermeable.
- ← Lentes con multicapa total (FMC).
- ← Prismas Abbe-Koenig con recubrimiento dieléctrico
- ← Garantía de por vida incondicional.
- ← Incluye bolsa de transporte premium con tapa abatible/ arnés y correa de hombro con el 5x56.
- ← Estuche EVA a medida para 8x45/10x45.

Bolsa para prismáticos y arnés

Bolsa de transporte protectora, ligera y compacta, con tapa abatible, compatible con todos los modelos de prismáticos ZeroTech más populares hasta 42 mm de diámetro de objetivo.

- ← Puntos de anclaje para prismáticos
- ← Construcción robusta y duradera
- ← 1 bolsillo con cremallera, 2 bolsillos laterales, 1 bolsillo trasero
- ← Cierre magnético con broche de seguridad
- ← Incluye arnés corporal de conexión en 4 puntos y correa para el hombro.
