

SCHRADER®

2023 CATALOG

ALPHA CLASS

The leader of the Schrade pack, the ALPHA Class of knives harbor all of the natural traits of a true alpha; a born leader, powerful, confident and protective. The ALPHA Class of knives feature premium handle and blade steel materials (such as S35VN) an aggressive styling, and are exclusively Made in the U.S.A. The ALPHA packaging also lives up to the hype with an aggressive style, premium soft-touch construction and a unique opening designed to ensure the customer they made the right choice and eliminate buyer's remorse.

BETA CLASS

In wolf packs, the beta is the second in command and the heir apparent to the alpha spot in the pack. The BETA Class of knives at Schrade is no different. This more subtle, yet confident, line of knives and tools carry upgraded handle and blade materials (such as D2) designed to outclass its competitors. The BETA Class consists of knives and tools made in high-quality factories in countries such as Taiwan, Japan, Germany and of course, the United States of America. The BETA Class of packaging is a hybrid hangable box that is just as at home hanging on a peg hook as it is behind the counter in a glass display case.

DELTA CLASS

Just as is the case in a wolf pack, the DELTA Class of knives and tools from Schrade are an extremely important part of the Schrade pack and where the boots really hit the ground. The DELTA Class of knives make up the bulk of the Schrade offering and feature high-quality steels (such as AUS-10) handle materials and are made in premium factories in China. These smooth, sleek and durable knives and tools are designed to overmatch the competition and provide customers with an incredible value proposition. The DELTA Class of products wear a high-quality trap blister packaging that quickly draws attention to the brand and products and gives consumers all of the information they need for a buying decision.

SCHRADER ICONS

Going back to the roots of its founder George Schrade, and building on his 1892 patent of the original switchblade, Schrade® once again looks to dominate the automatic knife market. Utilizing its mission of being “rooted in history, ready for the future”, Schrade automatic folders once again feature the famous push button mechanism made popular by George Schrade, this time with a modern, parallelogram button that you’ll also find in the middle of the Schrade icon. George Schrade’s patent of the automatic might date to 1892, but the new automatics are definitely ready for the future, with leading-edge designs, ultra-fast and smooth actions and positive lockups.

Schrade assisted folding knives got a complete overhaul and the new Nitro® Assisted action utilizes a simple, yet effective design that lives up to its namesake and ensures an ultra-fast, smooth and positive lockup. Designed for years of use and abuse, the Nitro Assisted line of folders make the perfect sidekick for your EDC needs.

What better way to kick off the new Schrade than with a line of double-action, out the front automatic pocket knives? That’s right, we said automatic! Following in George Schrade’s footsteps of being on the forefront of knife technology, Schrade once again sets the bar for the industry. The new proprietary double action automatic action is an unbelievable combination of speed, durability and functionality that will have you wondering how it’s possible you’re holding an automatic knife.

Once again focusing on being “rooted in history, ready for the future” mantra, Schrade brings back its proprietary and wildly popular OTF (Out the Front) assisted action. Featuring a smooth, ultra-fast blade release and positive lockup, this action is field-tested and designed to last a lifetime of use.

Every manual folding knife features the world-famous Schrade Ultra Glide® bearing system. Gone are the days of struggling to quickly open and close your folding knife. This tried and true mechanism ensures the quickest, smoothest action you’ve ever felt on a folding knife.

The Schrade pivot locking mechanism, coupled with the Schrade Ultra Glide bearing is ultra-smooth, allowing for quick opening and closing. Designed to be the most effective locking system for folding knives, the pivot lock mechanism is reliable and durable, ensuring a lifetime of use and abuse.

What’s the point of making a product that you won’t guarantee to be dependable, durable and designed to last a lifetime? That doesn’t fly at Schrade! All of our knives and tools are backed by a Limited Lifetime Warranty.

U.S.A.! U.S.A.! We’re back! Schrade brings production back to the greatest country on earth, the United States of America. Standard on all ALPHA Class knives and select BETA Class knives, if you see the Schrade “Made in the USA” stamp on a product, you can rest assured that it was made with good ole American muscle, grit and sweat.

Schrade is proud to offer their new lineup of knives and tools that are assembled in the U.S.A of domestic and foreign components. These BETA Class knives feature high-quality knife blades that are made in the United States of America, but source other materials at the best price we can in order to offer a high value knife.

The included sheath has an integrated sharpener built in for convenient in-the-field edge maintenance.

The included sheath has an integrated ferro rod built in for any frestarting task.
