## ALPHA CLASS

## BETA CLASS

## DELTA CLASS

The leader of the Schrade® pack, the ALPHA Class of knives harbor all of the natural traits of a true alpha; a born leader, powerful, confident and protective. The ALPHA Class of knives feature premium handle and blade steel materials (such as S35VN) an aggressive styling, and are exclusively Made in the U.S.A. The ALPHA packaging also lives up to the hype with an aggressive style, premium soft-touch construction and a unique opening designed to ensure the customer they made the right choice and eliminate buyer's remorse.

In wolf packs, the beta is the second in command and the heir apparent to the alpha spot in the pack. The BETA Class of knives at Schrade® is no different. This more subtle, yet confident, line of knives and tools carry upgraded handle and blade materials (such as D2) designed to outclass its competitors. The BETA Class consists of knives and tools made in high-quality factories in countries such as Taiwan, Japan, Germany and of course, the United States of America. The BETA Class of packaging is a hybrid hangable box that is just as at home hanging on a peg hook as it is behind the counter in a glass display case.

Just as is the case in a wolf pack, the DELTA Class of knives and tools from Schrade® are an extremely important part of the Schrade® pack and where the boots really hit the ground. The DELTA Class of knives make up the bulk of the Schrade® offering and feature high-quality steels (such as AUS-10) handle materials and are made in premium factories in China. These smooth, sleek and durable knives and tools are designed to overmatch the competition and provide customers with an incredible value proposition. The DELTA Class of products wear a high-quality trap blister packaging that quickly draws attention to the brand and products and gives consumers all of the information they need for a buying decision.

**AUTOMATIC  
ACTION**

Going back to the roots of its founder George Schrade, and building on his 1892 patent of the original switchblade, Schrade® once again looks to dominate the automatic knife market. Utilizing its mission of being “rooted in history, ready for the future”, Schrade® automatic folders once again feature the famous push button mechanism made popular by George Schrade, this time with a modern, parallelogram button that you’ll also find in the middle of the Schrade® icon. George Schrade’s patent of the automatic might date to 1892, but the new automatics are definitely ready for the future, with leading-edge designs, ultra-fast and smooth actions and positive lock ups.

**NITRO®  
ASSISTED**

Schrade® assisted folding knives got a complete overhaul and the new Nitro® Assisted action utilizes a simple, yet effective design that lives up to its namesake and ensures an ultra-fast, smooth and positive lock up. Designed for years of use and abuse, the Nitro® Assisted line of folders make the perfect sidekick for your EDC needs.

**DOUBLE  
ACTION**

What better way to kick off the new Schrade® than with a line of double-action, out the front automatic pocket knives? That’s right, we said automatic! Following in George Schrade’s footsteps of being on the forefront of knife technology, Schrade® once again sets the bar for the industry. The new proprietary double-action automatic action is an unbelievable combination of speed, durability and functionality that will have you wondering how it’s possible you’re holding an automatic knife.

**OUT THE  
FRONT**

Once again focusing on being “rooted in history, ready for the future” mantra, Schrade® brings back its proprietary and wildly popular OTF (Out the Front) assisted action. Featuring a smooth, ultra-fast blade release and positive lock up, this action is field-tested and designed to last a lifetime of use.

**ULTRA  
GLIDE®**

Every manual folding knife features the world-famous Schrade® Ultra Glide® bearing system. Gone are the days of struggling to quickly open and close your folding knife. This tried and true mechanism ensures the quickest, smoothest action you’ve ever felt on a folding knife.

**MADE IN USA**

U.S.A.! U.S.A.! We’re back! Schrade® brings production back to the greatest country on earth, the United States of America. Standard on all ALPHA Class knives and select BETA Class knives, if you see the Schrade® “Made in the USA” stamp on a product, you can rest assured that it was made with good ole American muscle, grit and sweat.

Schrade® is proud to offer their new lineup of knives and tools that are assembled in the U.S.A of domestic and foreign components. These BETA Class knives feature high-quality knife blades that are made in the United States of America, but source other materials at the best price we can in order to offer a high value knife.

**INCLUDED  
SHARPENER**

The included sheath has an integrated sharpener built in for convenient in-the-field edge maintenance.

**INCLUDED  
FERRO ROD**

The included sheath has an integrated ferro rod built in for any firestarting task.

New to the Schrade® Pack are Enrage replaceable blade knives aimed at never having to sharpen again! Whether you're wanting a replaceable blade knife for hunting or EDC, the enrage series has you covered.

Designed to offer OTF knives from Schrade® while limiting restrictions. Assisted OTF's are more accessible in more states, ensuring you carry responsibly.

A compact and indispensable tool designed for emergency situations. Featuring a hardened steel tip, this glass breaker is engineered to shatter windows effortlessly, providing a swift escape route when time is of the essence. Whether you're in a vehicle rescue scenario or need a reliable tool for personal safety, the Schrade® Glass Breaker is your essential companion, offering peace of mind and preparedness in critical moments.

Bringing together one of America's longest-lasting cutlery companies with one of the best-selling hunting broadheads of all time, the Schrade® Enrage Series provides the best functioning and most useful line of replaceable blade knives. Designed with Rage broadhead technology, the Enrage Replacement Blades are razor sharp. Whether you're breaking down your trophy or want to wield an extremely sharp EDC blade, the Schrade® Enrage series has an option for you.

A frame lock knife from Schrade® offers a range of benefits that make it an exceptional choice for both everyday carry and outdoor adventures. The robust frame lock mechanism provides secure blade retention, ensuring reliable performance during tough tasks.

The Schrade® Lockback mechanism offers a secure and reliable locking system for folding knives. Its design employs a sturdy metal spine that engages with the blade, ensuring it stays firmly in place during use, providing enhanced safety for the user. Additionally, this mechanism is known for its simplicity, making it easy to operate and maintain, making it a popular choice among outdoor enthusiasts and professionals alike.

The Schrade® pivot locking mechanism, coupled with the Schrade® Ultra Glide® bearing is ultra-smooth, allowing for quick opening and closing. Designed to be the most effective locking system for folding knives, the pivot lock mechanism is reliable and durable, ensuring a lifetime of use and abuse.

What's the point of making a product that you won't guarantee to be dependable, durable and designed to last a lifetime? That doesn't fly at Schrade®! All of our knives and tools are backed by a Limited Lifetime Warranty.

# THE UPROAR™ FAMILY

## REINVENTING THE VALUE OF THE DOUBLE-ACTION OTF

Ready in an instant, the Schrade® Uproar™ family has reinvented the value of the double-action out the front knife. In a \$300 market, the Uproar™ family comes in at a fraction of the price of the competition. With their slim, easy-to-grip aluminum handles, Uproar™ knives spring open to be ready to use instantly and can immediately retract back into the handle the moment you're finished cutting. In addition to the ease of use, the Uproar™ family sports quality D2 steel for a strong and durable blade and is assembled in the USA with foreign and domestic parts.

# ALPHA CLASS

## BUILT FOR THE LEADERS OF THE PACK

The leader of the Schrade® pack, the ALPHA Class of knives harbor all of the natural traits of a true alpha; a born leader, powerful, confident and protective. The ALPHA Class of knives feature premium handle and blade steel materials (such as S35VN) an aggressive styling, and are exclusively MADE IN THE U.S.A.

## KEEPING THE BALANCE OF THE PACK

In wolf packs, the beta is the second in command and the heir apparent to the alpha spot in the pack. The BETA Class of knives at Schrade® is no different. This more subtle, yet confident, line of knives and tools carry upgraded handle and blade materials (such as D2) designed to outclass its competitors. The BETA Class consists of knives and tools made in high-quality factories in countries such as Taiwan, Japan, Germany and of course, the United States of America.

## WORKHORSE OF THE PACK

Just as is the case in a wolf pack, the DELTA Class of knives and tools from Schrade® are an extremely important part of the Schrade® pack and where the boots really hit the ground. The DELTA Class of knives make up the bulk of the Schrade® offering and feature high-quality steels (such as AUS-10) handle materials and are made in premium factories in China. These smooth, sleek and durable knives and tools are designed to over-match the competition and provide customers with an incredible value proposition.
